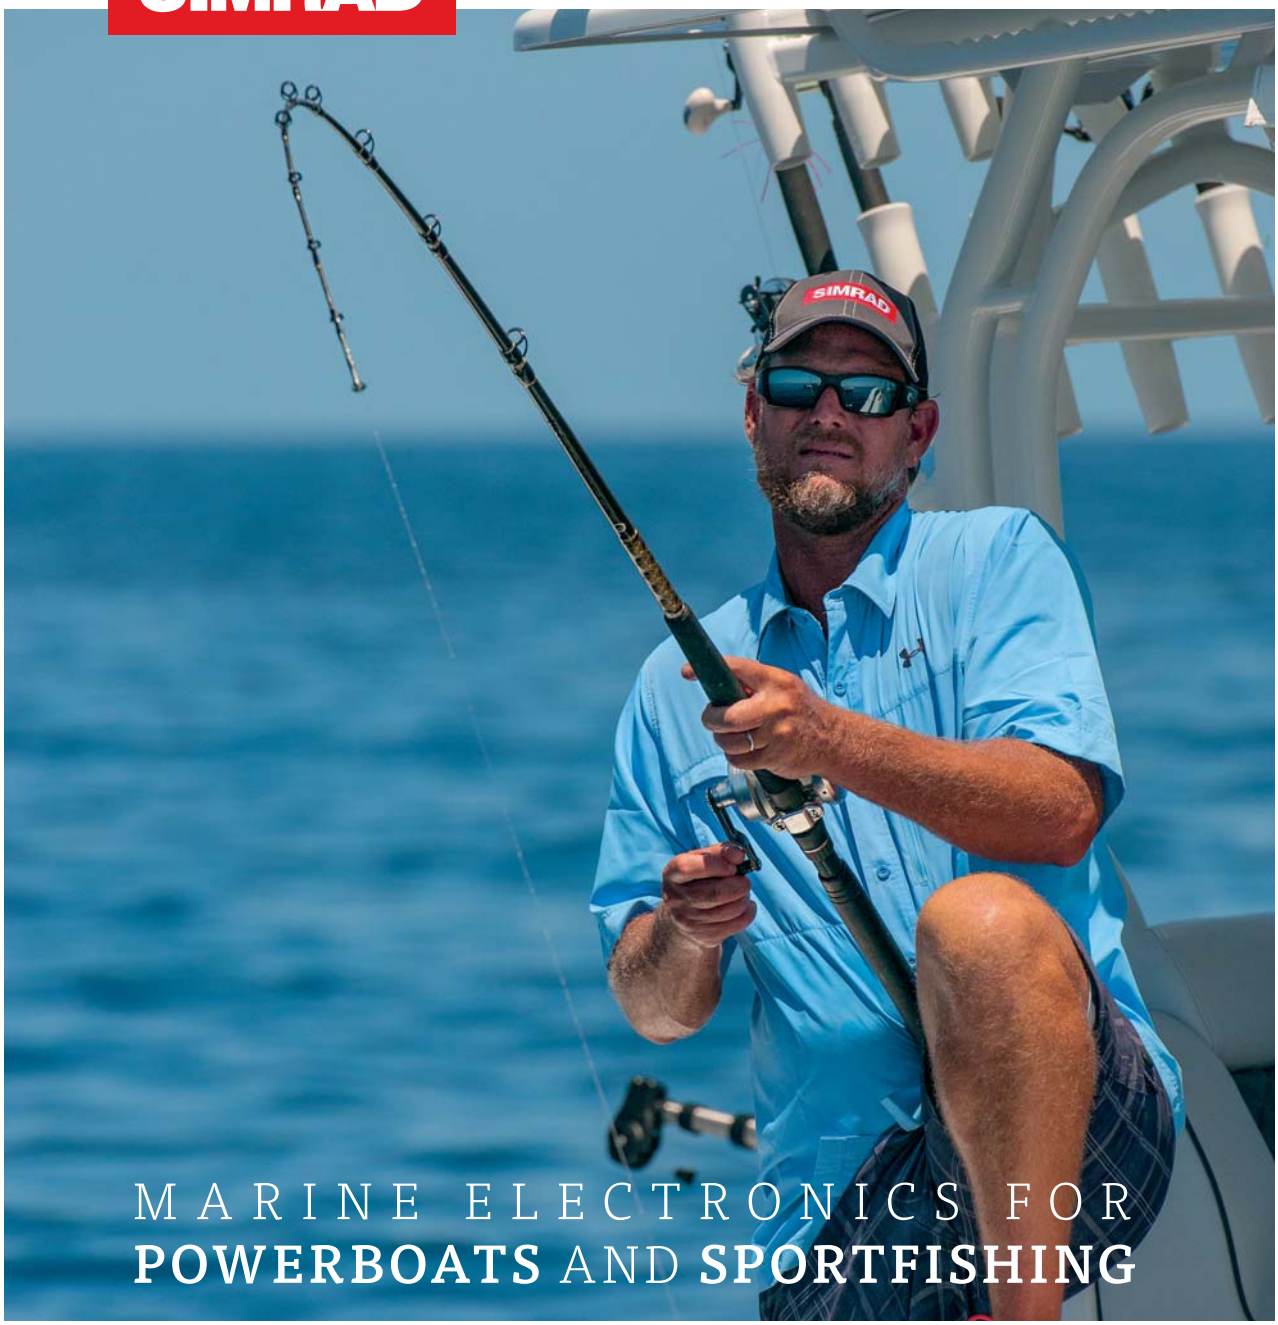
MARINE ELECTRONICS FOR
POWERBOATS AND **SPORTFISHING**

Go With Confidence

SIMRAD



MARINE ELECTRONICS FOR **POWERBOATS** AND **SPORTFISHING**

For over sixty years the name SIMRAD has meant one thing: rock solid, high performance marine electronics. It's a reputation that was earned the hard way, on commercial fishing vessels in the challenging waters of the North Atlantic. Today we carry on this legacy, combining advanced technology with intuitive user-friendly designs.
So whether your destination takes you around the harbor, or around the world, SIMRAD electronics will give you the confidence you need to make the most of your time on the water.

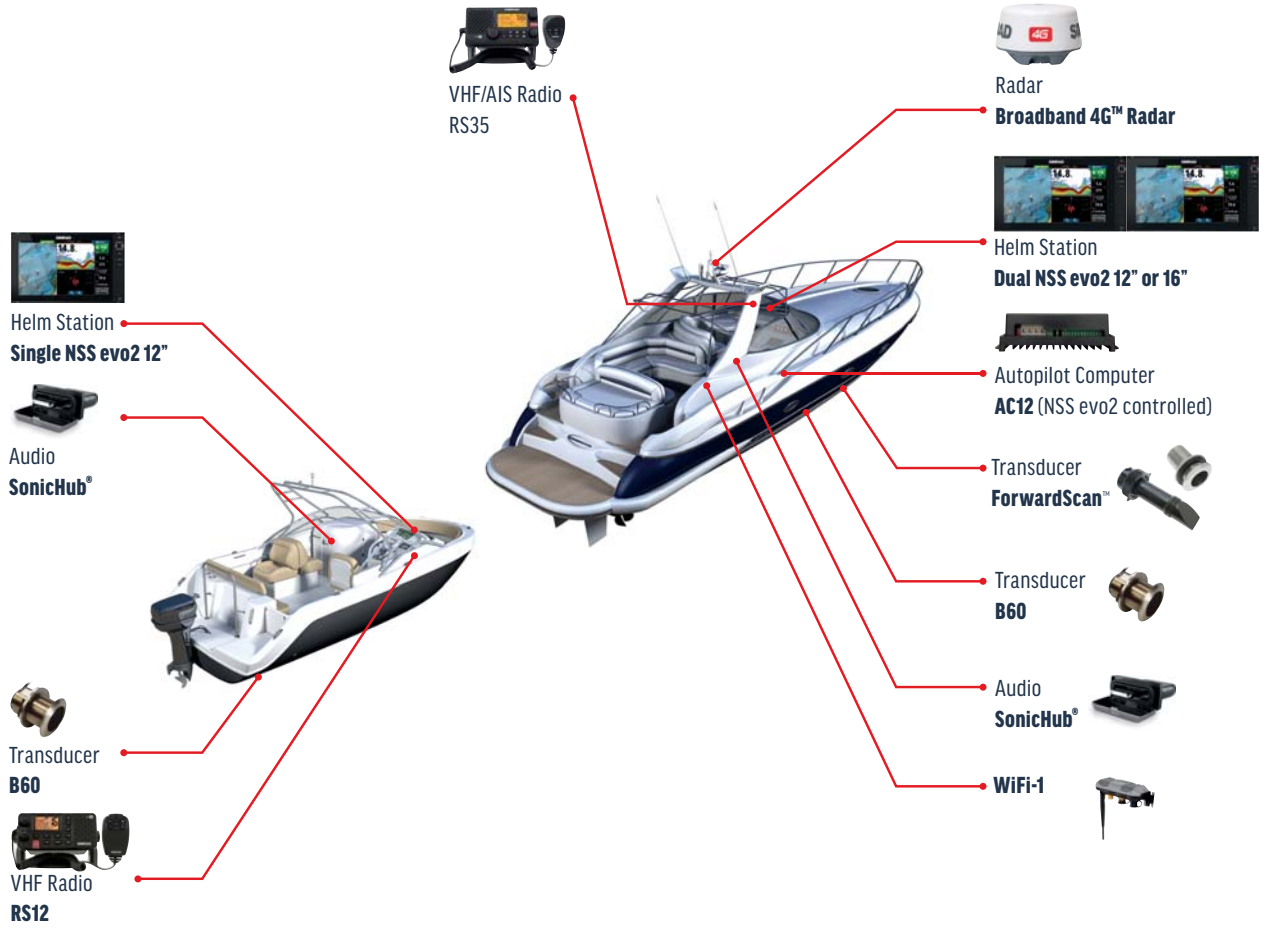
Industry-Leading Integration	22-23

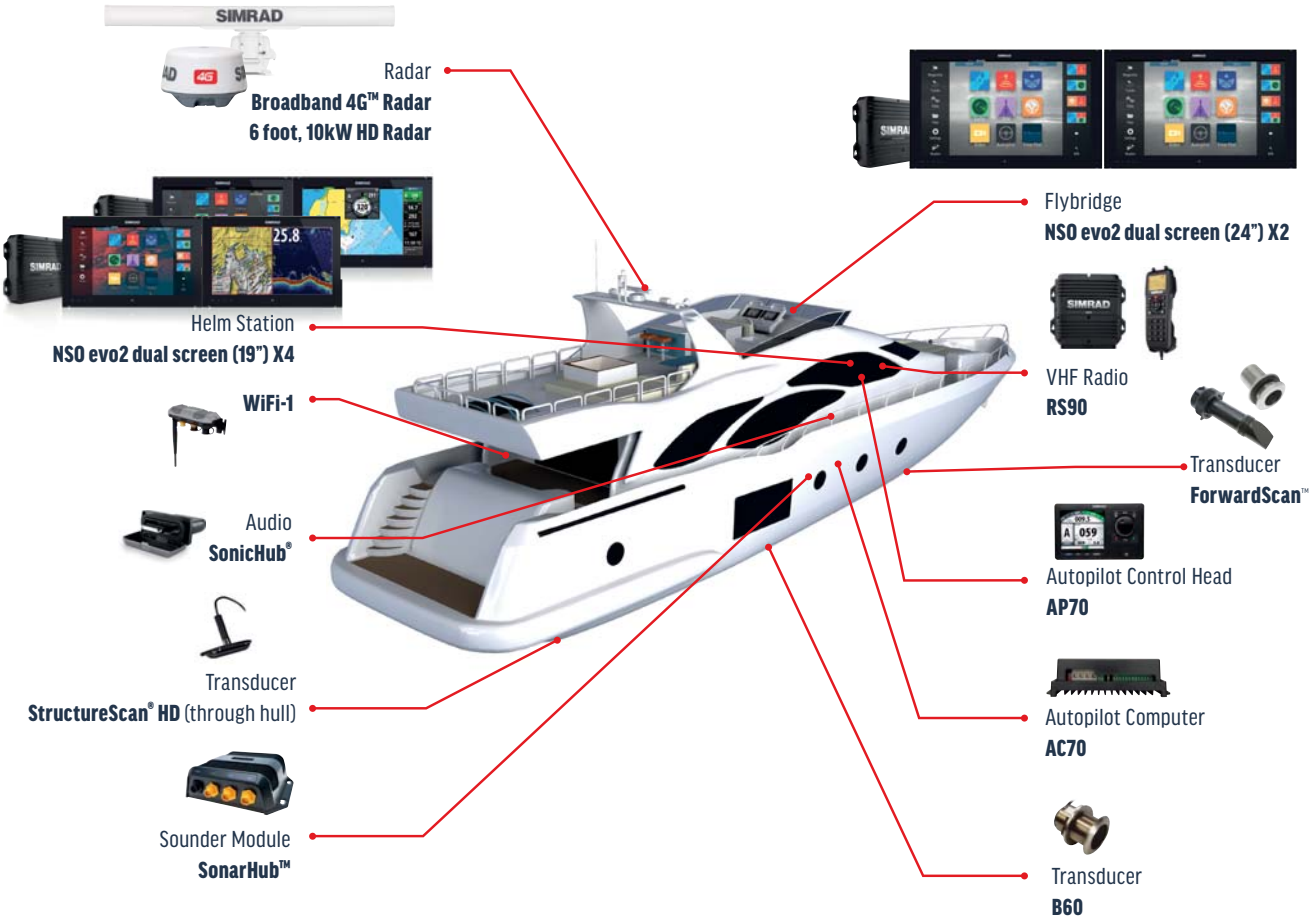
POWERBOATING

Simrad offers a dedicated solution for powerboats large and small. Navigate confidently and safely with intuitive multi-touch controls, automatic routing, and ForwardScan™ sonar. Command your autopilot, monitor distant weather and even control your onboard entertainment all from a Simrad Glass Bridge Multifunction Display system.

Small & medium powerboats
Single station powerboats
20 - 50 foot



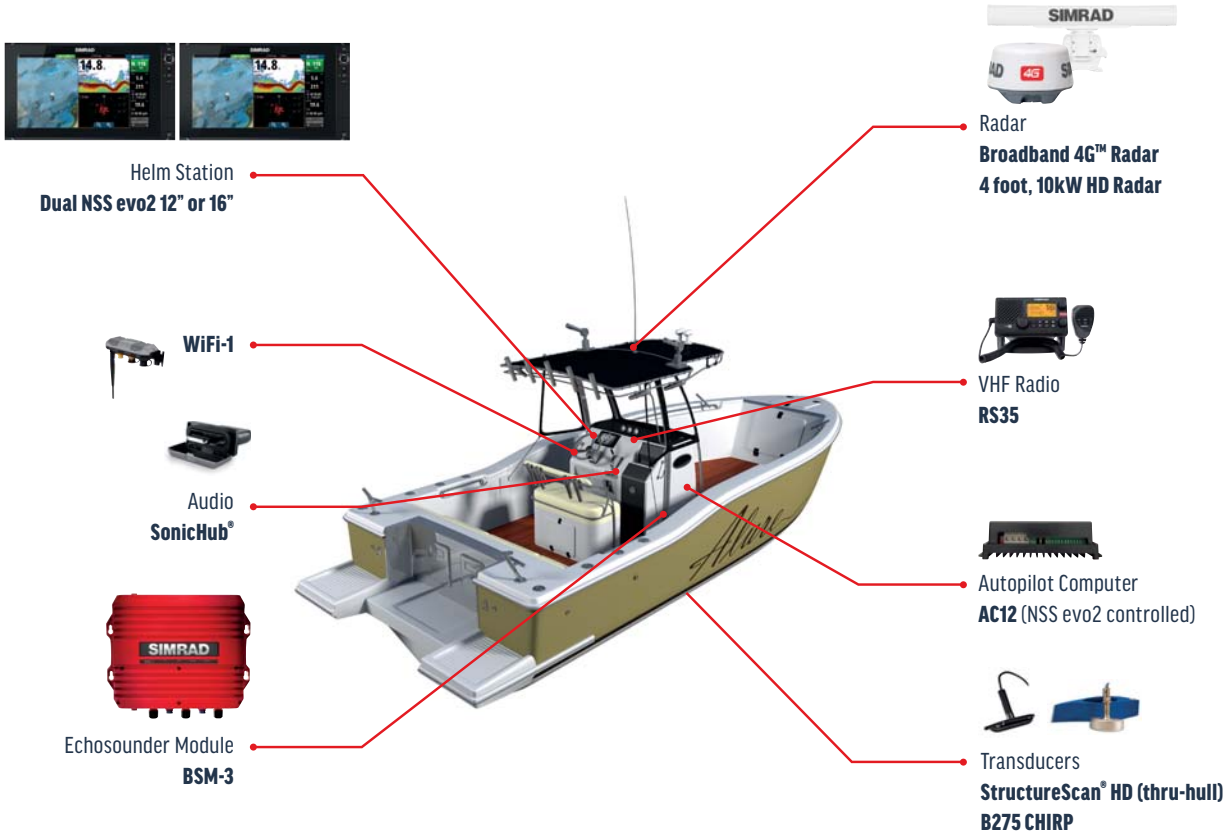
Motoryachts
Large dual station motoryachts
50 - 100+ foot



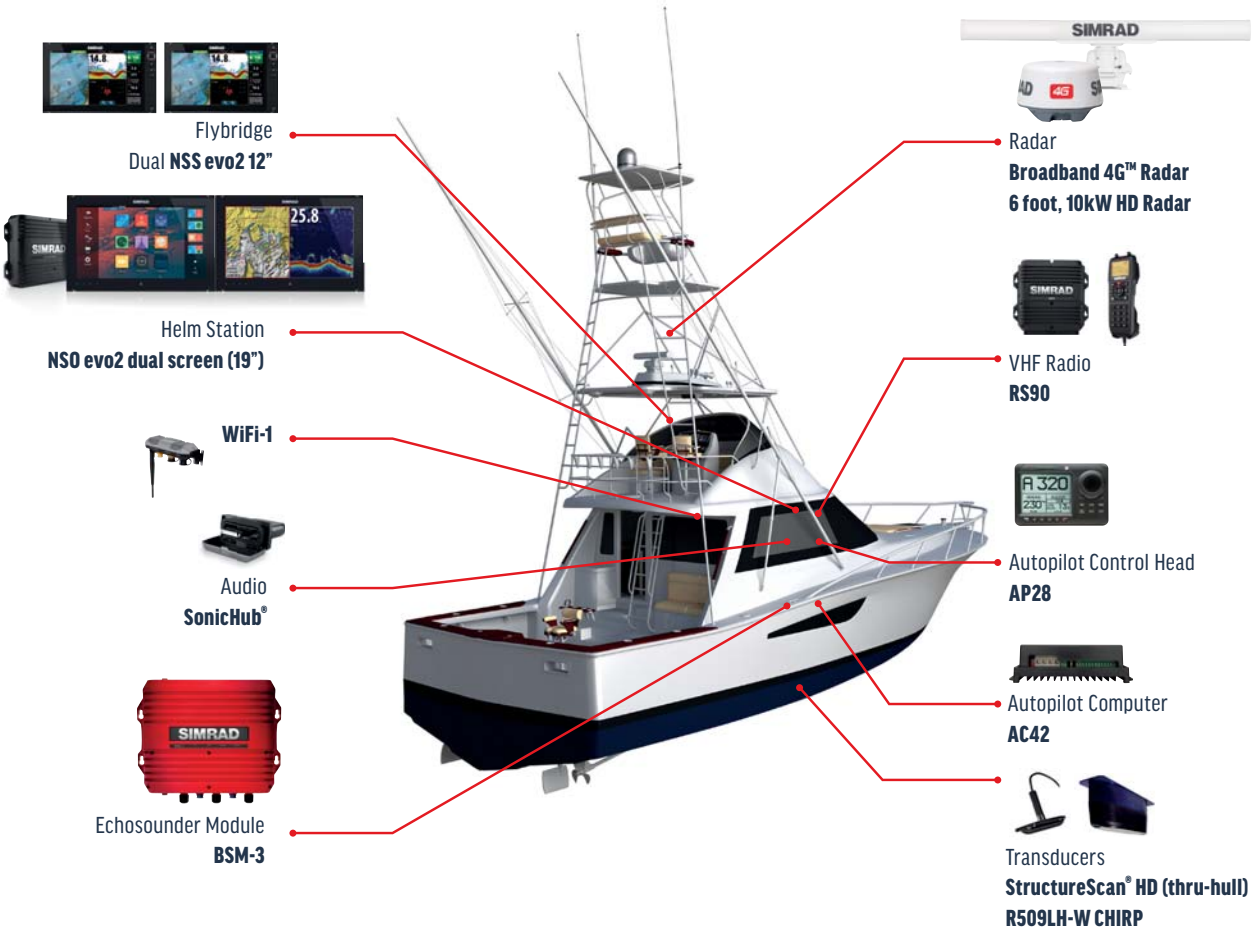
SPORTFISHING

With state-of-the-art fishfindng technology Simrad has the solution for all center console and sportfishing boats. Echosounders, StructureScan® HD sonar imaging, high-resolution radar, custom charting for anglers with Insight Genesis™, and a range of rugged and reliable multifunction display systems are available to suit all vessels.

Center Console
Single station sportfishers
20 - 40 foot



Large Flybridge
Dual station offshore sportfishers
40 - 70+ foot



Glass Bridge Navigation Systems

NSO EVO2

Simrad NSO evo2 Glass Bridge systems are perfectly suited to blue water powerboats and sportfishing vessels.

These systems deliver high processing power for fast charting, sonar, radar and entertainment across dual independent widescreen displays, with Simrad User Interface for intuitive multi-touch control, and expansive integration capabilities.

NSO evo2 Processor

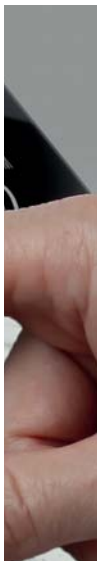
MO19 Monitors

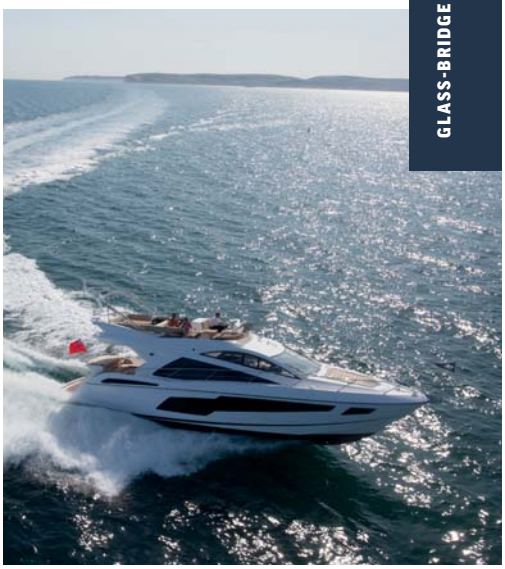
Optional OP40 Controller

Control two monitors independently with just a single NSO evo2 processor.

GoFree™ cloud enabled. Download & upload maps, software updates and apps direct to your navigation unit.

See pages 20/21 for more details.





PROCESSOR FEATURES

- Dual independent HDMI monitor outputs
- Widescreen Full HD monitor support
- Multi-touch interface with pinch-to-zoom
- Easily manage multiple displays with Bridge Control
- Integrates with the full range of Simrad radar solutions, BSM-3 Broadband Sounder, SonarHub™ with StructureScan ® HD/ ForwardScan® Sonar, and much more
- OP40 keypad & rotary controller option
- Widest choice of cartography options
- Multiple video inputs
- Dual quad-core processor
- Wireless connectivity

MONITOR FEATURES

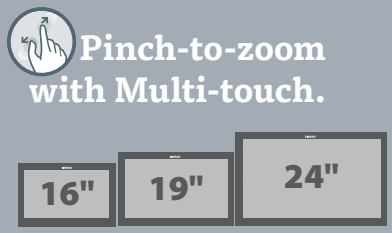
- Low 8mm flush-mount profile and all-glass design enhances the look of any helm
- HDMI, DVI & Composite Inputs

MO-T HIGH-BRIGHT TOUCHSCREEN MODELS

- 1000-nit high-brightness, sunlight-viewable screen
- Multi-touch control

MO-P PILOTHOUSE MODELS

- 300-nit brightness for pilothouse operation
- OP40 control



Simrad MO Monitors are available in 3 Sizes: 16-inch, 19-inch, and 24-inch

DESCRIPTION	PART NO.
NSO evo2 Processor	000-10998-001
NSO evo2 Dual 16" Multi-Touch monitor bundle	000-11485-001

Multifunction Display Navigation Systems

NSS EVO2

With an easy to use tablet-style interface that's fresh but familiar, the NSS evo2 combines a multi-touch screen with push-to-select rotary dial for precision control and speedy response in any conditions, from calm to rolling seas.

Available as standalone chartplotter/multifuction display or combined with CHIRP and StructureScan® HD for great fishfinding capability.

GOFREE™

GoFree™ cloud enabled. Download & upload maps, software updates and apps direct to your navigation unit.

See pages 20/21 for more details.

Built-in GPS and full autopilot integration make NSS evo2 ideal at the helm of any powerboat. Onboard StructureScan®HD sonar imaging, CHIRP-enabled Broadband Sounder, and integration with a wide range of other fishfinding technologies mean sportfishing enthusiasts will also find NSS evo2 the perfect choice.

FEATURES

- Widescreen display with bright LED backlight
- Multi-touch interface with pinch-to-zoom
- Internal high-speed GPS antenna
- Built-in SonarHub™ Sounder technology with CHIRP and StructureScan® (on select models)
- Autopilot integration
- Widest choice of cartography options
- Works with our full range of radar and echosounder solutions, ForwardScan™ Sonar, SonicHub™ entertainment, and more
- Wireless connectivity
- NMEA2000®, 0183® & Ethernet connectivity

All models include embedded cartography. NSS7, NSS9, NSS12 & NSS16 evo2 combo models include onboard SonarHub™ echosounder.*

*Not included on the chartplotter-only NSS7m & NSS9m evo2.

Pinch-to-zoom with Multi-touch.

Simrad NSS Multifunction Displays are available in 4 Sizes: 7-inch, 9-inch, 12-inch and 16-inch.

DESCRIPTION	PART NO.
NSS7M evo2 (no built-in echosounder) Multifunction Display	000-11182-001

Radar

DESCRIPTION	PART NO.
Broadband 4G™ Radar	000-10421-001
Broadband 3G™ Radar	000-10420-001

Broadband Radar

Enjoy a crystal-clear image, right up to the bow of your boat, with our incredible Broadband Radar. Solid state technology does away with the traditional magnetron and instead offers lower emissions than a mobile phone, making these systems safe to mount anywhere, on any size boat. There are two Broadband Radar options -- the outstanding Broadband 3G™ Radar, which has a 28NM working range, and the revolutionary Broadband 4G™ Radar, which has advanced features and up to a 36NM working range.

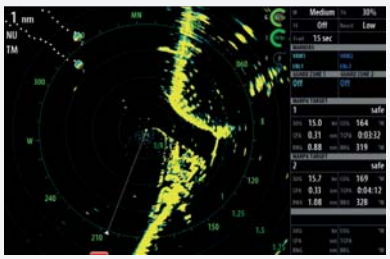
BROADBAND 3G/4G™ RADAR FEATURES

- Crystal-clear image
- Automatic clarity
- MARPA target tracking
- Dual guard zones
- InstantOn™
- Low power consumption
- Extremely low emissions
- Quick installation

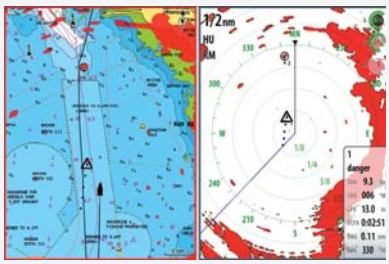
BROADBAND 4G™ RADAR ONLY FEATURES

- Up to 36NM working range
- Beam Sharpening
- High speed mode (48RPM)
- Dual Range
- Advanced target detection

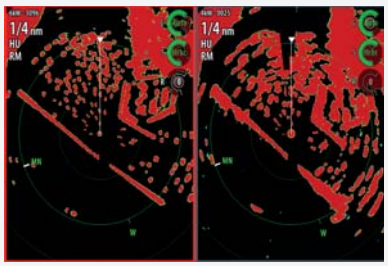
BEST IN CLASS RADAR PERFORMANCE



Display up to 10 MARPA targets



Chart/Radar Overlay



Unrivalled target discrimination

DESCRIPTION	PART NO.
TXL-10S-4 10 kW 4 ft open array low emission radar kit.	000-11477-001
TXL-10S-6 10 kW 6 ft open array low emission radar kit.	000-11478-001
TXL-25S-7 LOW Emission 25kW 7ft Antenna	000-11476-001

HD Digital Radar

Our HD Digital radars combine high performance open-array scanners with the latest in digital signal processing and a proven history of oceangoing reliability. Experience unparalleled situational awareness with exceptional range, high resolution, and compliance with tough IMO IEC62388 Annex D target detection specifications.

FEATURES

- Available in 4-foot/10kW, 6-foot/10kW, and 7-foot/25kW
- 64, 72, or 96nm instrumented range
- 1.8°, 1.2°, or 1.0° beam resolution
- Automatic Harbour and Offshore Modes
- Dual EBL/VRM
- Dual Guard Zones
- 10-target MARPA tracking

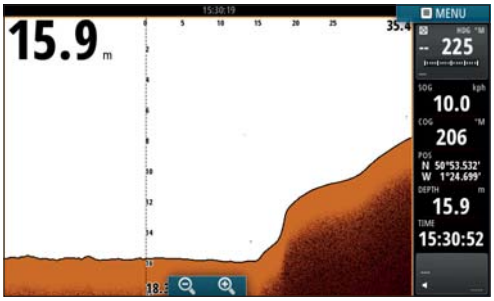
ForwardScan™ Sonar

ForwardScan™

Know what lies ahead, with Simrad ForwardScan Sonar. This forward-looking sonar provides a clear two-dimensional image of the bottom in front of your vessel, allowing you to navigate shallow or poorly-charted waters with confidence. With real-time updates and a forward-looking view of up to eight times your current depth, ForwardScan Sonar lets you relax and enjoy a safer day on the water.

FEATURES

- Clear view of what's below the surface
- Locates floating objects
- Avoid running aground
- Shallow depth alarm
- Built-in temperature sensor
- Through-hull fitting with stainless sleeve
- Easy to install
- Simrad NSS evo2 & NSO evo2 compatible



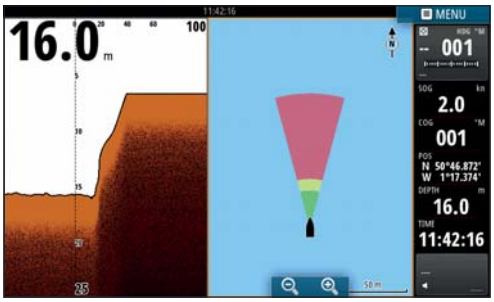
Bottom Color Tracking offers a solid 2D rendering of the bottom ahead of your vessel for an uncluttered, immediately understandable view.

Maximum forward view of 8X your current depth

e.g. at 3m (10ft) depth, see up to 24m (80ft) ahead.

Nominal forward view of 4-5X your current depth

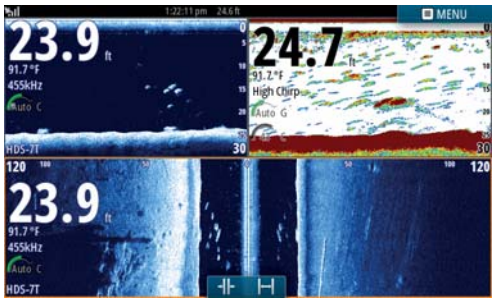
e.g. At 3m (10ft) depth, see 12-15m (40-50ft) ahead.



Heading Line View integrates ForwardScan Sonar depth data with the heading line on the navigation page of your Simrad MFD, with simple color-coding to represent deep, medium, and shallow water.

DESCRIPTION	PART NO.
Forwardscan Transducer (XDCR kit)	000-11674-001
Forwardscan Transducer (no sleeve or plug)	000-11675-001
Forwardscan Pre-fit Pack (sleeve & plug only)	000-11669-001
SonarHub™ (required for operation on NSO)	000-11142-001

Echosounder Modules



SonarHub™ Sounder Module

This all-in-one sounder solution combines StructureScan® HD and CHIRP sonar. SonarHub™ is ideal for marking fish and tracking lure action and can provide easy-to-understand views of structure and bottom detail. Offering a powerful performance advantage in any situation, SonarHub's Frequency Sweeping Pulse Compression technology – known as CHIRP sonar — provides high-definition detail to depths of up to 3,500 feet. SonarHub's StructureScan® HD functionality gives boaters picture-like displays for more productive fishing, diving and search and recovery operations.

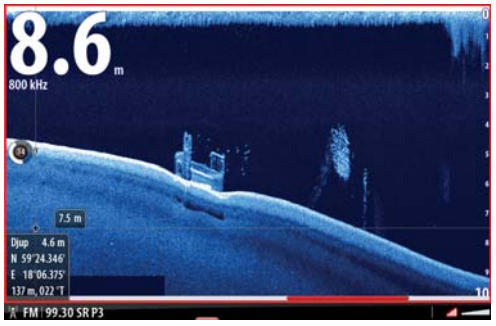
FEATURES

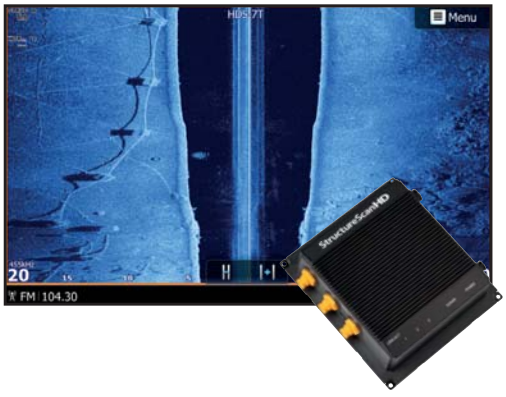
- CHIRP 'whispers' into the water, helping to locate fish without disturbance
- Dual transducer ports: Connect one broadband CHIRP or traditional single-frequency transducer, and one StructureScan® HD or ForwardScan® transducer
- Use any Simrad/Airmar™ transducer with blue 7-pin connector
- Three built-in Ethernet ports for connection to multiple Simrad displays

DESCRIPTION	PART NO.
SonarHub™	000-11142-001

StructureScan® HD

Revolutionise the way you see underwater with the ultimate in reality echosounding technology. Not only can you see high detail with SideScan coverage, but also exclusive DownScan™ images to provide a true 180° view below your boat. This high frequency imaging gives a lifelike representation of the water column, the bottom and any structure. See fish, rocks, weeds and wrecks like never before. Great for fishing, diving and anchoring.

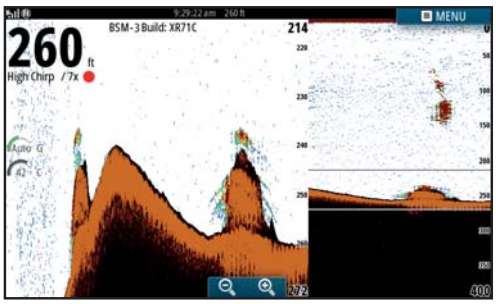


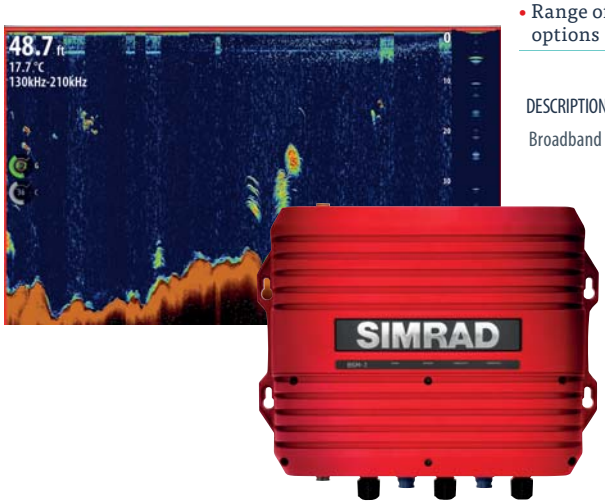


FEATURES

- Picture-perfect DownScan™ imaging
- Panoramic SideScan view
- Overlay DownScan onto Broadband Sounder images
- TrackBack™ to scroll through sonar history
- StructureMap™ underwater chart generation
- Range of transducer options: bronze or plastic for transom, thru-hull, or deep-v installation

DESCRIPTION	PART NO.
LSS HD - StructureScan® HD Sonar Imaging module only.	000-10801-001
LSS HD - StructureScan® HD Sonar Imaging module with transducer and 6 m (20 ft) cable.	000-10800-001





NEW BSM-3

Designed for professionals and serious sportfishing enthusiasts, the BSM-3 is a high performance, dual-channel broadband sounder with CHIRP technology. Its 3,000m / 10,000ft working range means you can venture further offshore, with the confidence to find the fish you're looking for.

FEATURES

- 3000m range (transducer dependent)
- Dual-channel CHIRP echosounder
- Range of transducer & frequency options
- Industry leading target separation and clarity
- Easy to use with auto/manual modes
- Rugged all-aluminium housing

DESCRIPTION	PART NO.
Broadband Sounder Module (BSM-3)	000-11742-001

Autopilots / Instruments

Our autopilot systems offer proven performance and reliability for all types of sportfishing and power boats, from 18-100 foot. Design an autopilot system to best suit your vessel and requirements – operate your autopilot entirely from a Simrad MFD, or add an autopilot head unit for dedicated controls. Learn more with our Autopilot Buyers Guide, available online at **Simrad-Yachting.com/AutopilotGuide**

FEATURES

- Easy to use
- Full Simrad MFD integration
- Dedicated control units available
- Integrated turn patterns
- Dodge function
- NoDrift steering
- Constant depth tracking
- Virtual rudder feedback

AP24 / AP28

The award-winning Simrad AP24 and AP28 offer a classic high-visibility display and button-driven interface, combining everything you need to control your Simrad autopilot in one compact control unit.

FEATURES

- Integrated display & controller
- Large, clear digits
- AP28 includes rotary dial for easy heading adjustment

DESCRIPTION	PART NO.
AP28 Control Unit	22096366
AP24 Control Unit	22096267
AP24 Virtual Rudder Feedback System: AP24, AC12 Computer, RC42 Rate Compass, RPU80 Pump	AP2403VRF

IS40 & OP10

Combining an OP10 autopilot controller with an IS40 display creates an intuitive autopilot control system, where controller and display can be mounted separately to best suit your helm configuration.

FEATURES

- Full colour screen
- Intuitive keypad controller
- Flexible installation options

DESCRIPTION	PART NO.
IS40 Autopilot pack	000-11486-001
OP10 Pilot controller	000-10932-001

Simrad MFD Integration

Take command of your Simrad autopilot with your NSS evo2, NSO evo2, or other compatible Simrad multifunction display. With full on-screen controls, there's no need for a separate autopilot control unit.

FEATURES

- On-screen autopilot controls
- Rotary-dial steering on TouchSensible™ models
- Perfect for Glass Bridge setups

DESCRIPTION	PART NO.
IS40 Digital display	000-10931-001
IS40 Speed, Depth pack	000-10955-001

IS40 Color Displays

These full-color digital instrument displays are incredibly easy to use, bright and highly visible, with a massive 170° viewing angle. Featuring multiple data pages to suit almost any application, the IS40 provides the information you want, when and where you want it. With engine data integration and autopilot capabilities, the IS40 is much more than a traditional instrument display.

FEATURES

- Large, full-color display
- Straightforward menu system
- See speed, depth, wind, autopilot, engine data, and more
- Bonded LCD for zero condensation
- 170° viewing angle
- Bright screen with high contrast
- Micro-C connectivity
- Easy installation

Communications / AIS / Audio

RS90 VHF Radio System

Not just a radio, the RS90 also functions as an AIS receiver, hailer, foghorn, and onboard intercom. A thirty second record and replay means you never miss anything vital, and with up to 6 handsets you need never be out of reach.

FEATURES

- Modular "black-box" system with built-in AIS receiver
- Supports up to 4 wired + 2 wireless handsets
- PA/Hailer and foghorn
- 30-second Record and Playback
- IPX7 waterproof

DESCRIPTION	PART NO.
RS90 BB VHF AIS RX system	000-11225-001
RS90 Handset & speaker kit	000-11226-001
RS90 Handset	000-11228-001
VHF W/L Handset ,HS35,DSC	000-10791-001

RS35

This versatile and rugged fixed-mount VHF radio is easy to use, with extra-large high resolution display and smooth rotary controller. With DSC and AIS built-in, the RS35 includes everything you need to communicate.

FEATURES

- Class-D DSC Approved
- Built-in AIS receiver
- Loud and clear audio
- Dual/Tri watch function
- NMEA2000® & 0183® connectivity

DESCRIPTION	PART NO.
RS35	000-10790-001

HS35

The HS35 wireless handset works with your RS90 or RS35 radio to provide complete VHF, AIS and DSC functionality anywhere on board your boat, while also serving as an intercom between handsets and base station.

FEATURES

- Intercom function
- 100m range
- 8 hour battery life
- Inductive charting
- IPX7 waterproof

DESCRIPTION	PART NO.
HS35	000-10791-001

NAIS-400

Reduce your risk of collision with this fully integrated Class-B AIS transponder – essential for navigating busy shipping lanes and congested ports. The NAIS-400 networks easily with any NSS, NSE, or NSO display and Simrad RS VHF system.

FEATURES

- Class-B Approved AIS Transponder
- Integrates with existing Simrad MFD & VHF
- NMEA2000®, 0183® connectivity
- IPX7 waterproof
- Low power consumption

DESCRIPTION	PART NO.
NAIS-400	000-10981-001

SonicHub™ Audio Server

Eliminate the need for a separate stereo head unit and control playback directly from your Simrad MFD. SonicHub™ features Bluetooth streaming, AM/FM radio and optional dash-mounted UNI-Dock for smartphones, media players and flash drives.

FEATURES

- Bluetooth streaming audio
- AM/FM Radio
- Sensational sound quality
- Multi-zone volume control
- 4-channel 50W amplifier built-in

DESCRIPTION	PART NO.
SonicHub™ audio server pack	000-11606-001
Simrad Unidock	000-11257-001

IS35 Color Display

Easily visible day or night, the IS35 offers an interface to engine data, fuel efficiency, depth history and more. Connected by NMEA 2000, the IS35 automatically detects and displays the most relevant information on a series of pre-set, customisable data pages.

FEATURES

- Simple button-driven menus
- Automatically displays data from NMEA 2000 engines and sensors
- Monitor up to two engines per gauge
- Stylish-low-profile design
- Single-cable installation

DESCRIPTION	PART NO.
IS35 Color Instrument Display	000-11756-001

GOFREE™

GoFree™ - A new name in marine technology, encompassing mapping, telematics, apps and software solutions powered by the GoFree™ cloud and offered across a variety of platforms including chartplotters, multifunction displays, mobile phones, tablets and computers.

GoFree™ cloud-enabled marine content and services:

- Receive automatic software updates direct to multifunction displays/ chartplotters
- Download the latest charts from Insight, Jeppesen C-MAP, and other third parties directly to the boat from the GoFree™ Shop
- Download a variety of apps to enhance boating experiences
- With Insight Genesis™, upload sonar logs and download personal and Social Map maps directly from marine displays
- View & control multifunction display/ chartplotter screens on smartphones & tablets**
- Multi-platform support of content on computers, tablets, smartphones and marine displays
- Utilize dedicated marine apps from mobile devices
- Define secure user access for ultimate safety
- Connect remotely to view boat location and history

* Also needs wifi-1 unit

** Control function only available on compatible tablets and viewing function with both tablets and compatible smartphones. Requires GoFree™ Viewer and Controller app downloads.

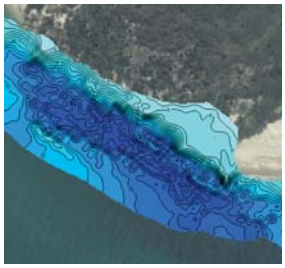
Insight Genesis™

Create your own custom charts, from real sonar data that you record with your Simrad echosounder. See unprecedented detail with accurate, high-resolution 1-foot depth contours, bottom hardness, and even vegetation maps – created in minutes with the GoFree™ cloud-based Insight Genesis™ service.



Map coastal waters in unprecedented detail with 1-foot contours

Discover the Insight Genesis™ Social Map, a collaborative map of inland and coastal waters around the globe, with coverage continuously expanded and refined by the Insight Genesis™ user community.

FEATURES

- Create detailed maps from your own sonar logs
- User-selectable 1, 3, 5, or 10-foot contours
- Bottom hardness and vegetation overlays
- Simple cloud-based software, nothing to install
- Build up-to-date maps for safer navigation
- Locate fish-holding features with ease
- View maps online on your PC, smartphone, or tablet
- Download maps to use on your Simrad chartplotter
- Upload sonar logs and download Genesis maps directly to you chartplotter with GoFree™

insightstore.navico.com

Go Wireless

The WIFI-1 module provides connectivity from your NSS evo2 or NSO evo2 chartplotter to the GoFree™ Cloud. This enables access to the GoFree™ store, allowing software updates and item purchase, such as charts. In addition, WIFI-1 provides a link between Simrad multifunction displays and smartphones or tablets with GoFree™ viewer and controller applications for screen repeat and/or control.*

WIFI-1 Module

- One unit is all you need
- Integrates easily with your existing network
- Automatic setup
- Low-profile design
- Rugged and waterproof
- Combine multiple to extend coverage on larger vessels

*GoFree store and wireless device connection cannot be maintained at the same time.

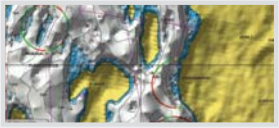
DESCRIPTION	PART NO.
GoFree™ WIFI-1 Module	000-11068-001

C-MAP MAX-N Wide

C-MAP™

www.c-map.com

C-MAP MAX-N Wide enhances your navigation experience with harbour and approach chart detail, detailed marina charts, and coverage of inland rivers and lakes. Plan trips easier with Jeppesen Easy Routing™ and Jeppesen Tides and Currents, available with MAX-N+ charts on Simrad NSS and NSO evo2 series MFDs. Download with GoFree™.



Navionics® Platinum+

Navionics®

www.navionics.com

Navionics offers powerful plug-and-play electronic charting choices for supreme navigational awareness. Bring the convenience of in-car navigation to boating with Navionics Autorouting™, available with Navionics+ and Platinum charts on Simrad NSS and NSO evo2 series MFDs. All Simrad multifunction displays / chartplotters provide a choice of mapping solutions including Navionics. Navionics is not available via the GoFree™ Shop.

Industry-Leading Integration

Simrad marine electronics offer some of the widest and most in-depth integration options on the market today. The advanced multifunction displays are effortlessly and almost infinitely expandable with award-winning echosounder technology, StructureScan® HD sonar imaging, Broadband 4G™ Radar, autopilot, SonicHub® marine audio systems, AIS and much more.

Add industry-standard NMEA2000® and NMEA0183® connectivity, high-capacity Ethernet networking, and wireless connectivity to smartphones and tablets, and you'll find Simrad integrates seamlessly throughout your vessel, delivering the ultimate confidence and control.

High Speed GPS

Incredible position accuracy, however fast or slow you go.

- 16-channel 10Hz GPS antenna
- Superior signal acquisition
- Compact design
- Easily flush-mounted

WIFI-1

View and control your MFD with your smartphone or tablet, from anywhere on board.

- Free viewer app
- Free controller app
- Open protocol enables custom app development

SonicHub®

Fully integrated marine audio server with Bluetooth streaming and AM/FM radio.

- Control your music from your MFD
- iPhone, iPod & iPod Touch compatible
- Play MP3 files from a USB drive
- Fully waterproof

Echosounder Modules

Innovative sonar technologies designed for every requirement.

- SonarHub™ Sounder Module
- ForwardScan™ Sonar
- StructureScan® HD
- BSM-3 with CHIRP

CZONE™

Turn your vessel into a smart boat with CZone™ digital switching and fully automate your onboard electronics.

- Full electrical panel on your MFD
- Control it all, from lighting to bilge pumps
- Monitor power consumption, battery and tank levels
- Define custom alarms

Autopilot

Award-winning, ocean-proven autopilot systems to suit any size and type of vessel.

- Dedicated control or Simrad MFD integration
- Predefined turn patterns
- Dodge function
- NoDrift steering

AIS

Reduce the risk of collision with this see and be seen technology.

- Class B AIS transponders
- Transmit your location
- Track and identify AIS-equipped vessels
- AIS navigational overlay

Broadband Radar

Confidently navigate congested waterways and harbours with unprecedented close-range performance.

- Innovative FMCW technology
- Range up to 36nm
- Eliminates “main bang” dead zone
- Efficient low-power technology
- Mount anywhere on board

HD Digital Radar

See further and in greater detail with our high-definition open array radar.

- High definition clarity with reduced screen clutter
- Range up to 96nm
- Navigate, find birds, and monitor weather
- True colour displays for storm imagery
- Auto harbour and offshore modes
